## DETAILED ACTION

According to the Preliminary Amendment filed 1/10/06, claims 1-9 have been canceled and claims 10-18 are new.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 10-18 rejected under 35 U.S.C. 102(b) as being anticipated by Jacobs (US Patent No. 3,068,877).

Jacobs teaches a dishwasher 10 having therein racks 48 for washing and drying dishes. Heat transfer fins 77 (heating) surround the outer part of duct 74 (heat tube), and condenser 60 (cooling) is formed therein. As seen in Figure 1 of Jacobs, the flow of air travels from the washing basket to opening 76 through condenser 60, then out outlet 78 and returned back to the washing machine; this flow of air is facilitated by impeller 104 (fan).

At the same time, impeller 96 draws cooling outside air into duct 84 through inlet 86 and forces this air into a counterflow moisture condensing relationship with the vapor in duct 74.

***Conclusion***
